Muhammad Hassan Khan

Date of birth: 16/03/2001 | **Nationality:** Pakistani | **Gender:** Male | **Phone number:** (+92) 03218147330 (Mobile) | **Email address:** hassankpisces@gmail.com | **Website:** https://hassankhan-hk.vercel.app/

ABOUT ME

You can provide a Software Engineer with 2+ years of professional experience in backend and full-stack web development. Experienced in building production applications, APIs, business systems, and automated workflows using Laravel, JavaScript, React, Next.js, NestJS, and relational databases. Strong interest in solving real-world technical problems, learning new technologies, and growing through challenging software engineering roles.

EDUCATION AND TRAINING

21/09/2020 – 12/07/2024 Karachi, Pakistan

BACHELOR OF SOFTWARE ENGINEERING Bahria University Karachi Campus

Software Engineering, Software Development, Computer Programming, Object-Oriented Programming, Data Structures and Algorithms, Database Management Systems, Operating Systems, Software Requirements Engineering, Software Design and Architecture, Software Construction, Web Engineering, Computer Networks, Embedded Systems, Data Mining, Cloud Computing, Information Security, Data Encryption and Security, Human-Computer Interaction, Software Quality Engineering, Agile Software Development, Software Project Management, Software Metrics and Estimation, and Software Testing.

Level in EQF EQF level 6

WORK EXPERIENCE

SOFTWARE ENGINEER – V2F SOLUTIONS – 25/07/2024 – Current – KARACHI, PAKISTAN

Software Development & Backend Engineering

- Develop and maintain web applications based on client and business requirements, with a strong focus on backend development.
- Develop REST APIs, business logic, administrative panels, and automated workflows using PHP/Laravel and NestJS.
- Work across the full stack using React, Next.js, MySQL, and PostgreSQL.

Key Responsibilities

- Implement payment and subscription-related functionality, including Stripe integrations.
- Develop Role-Based Access Control (RBAC) and activity logging using Spatie.
- Build dynamic forms, business workflows, background jobs, queues, and process automation.
- Integrate frontend and backend systems and troubleshoot application issues.
- Work with databases to develop, maintain, and optimize application functionality.
- Collaborate with development teams to understand requirements, solve technical challenges, and deliver features within project deadlines.
- Participate in developing and maintaining production applications while ensuring reliability and maintainability.

ASP.NET INTERN – SOFTFIT TECHNOLOGIES – 02/08/2023 – 01/10/2023 – KARACHI, PAKISTAN

Enterprise Application Development

- Worked on business applications using C#, ASP.NET, SQL Server, JavaScript, HTML, and CSS.
- Developed and maintained features for Attendance and Leave Management modules.
- Implemented CRUD functionality and resolved application bugs and technical issues.
- Worked across frontend, backend, and database layers to integrate new functionality.

- Improved the user interface and consistency of the Attendance module.
- Gained practical experience in enterprise application development, debugging, database integration, and working within a professional software development team.

SKILLS

computer programming | analyse software specifications | define technical requirements | identify customer requirements | interpret technical requirements | debug software | develop software prototype | use software design patterns | use software libraries | software frameworks | integrate system components | use object-oriented programming | use query languages | use an application-specific interface | design user interface | project management | software components libraries | web services | Agile development | PHP | JavaScript | Python (computer programming) | C# | TypeScript | SQL | ASP.NET | PostgreSQL | MySQL | manage database | Internet of Things

PROJECTS

2023 – 2024

IoT Sensors Based Smart Farm Irrigation System

Bachelor's Final Year Project – PEC-FYDP 2023

- Developed a smart irrigation system using IoT sensors to monitor soil moisture and support automated irrigation.
- Integrated software, sensors, databases, and user-facing components to provide real-time monitoring and control.
- Project focused on improving water efficiency and addressing agricultural water-management challenges.
