Muhammad Hassan Khan

Software Engineer | Laravel / PHP Backend & Full-Stack Developer

Karachi, Pakistan | +92 321 8147330 | hassankpisces@gmail.com
Portfolio: hassankhan-hk.vercel.app | GitHub: github.com/Hassan-Khan16
LinkedIn: linkedin.com/in/hassan-khan-81b832193

Professional Summary

Laravel/PHP backend-focused full-stack developer with 2+ years of experience building production web applications. Builds REST APIs, role-based access control, Stripe subscription flows, configurable workflows and map-based dynamic questionnaires, with Next.js/React front ends on MySQL and PostgreSQL. Has built features for five platforms across nutrition, accreditation, education, project operations and accident reporting.

Technical Skills

Core Stack: PHP, Laravel, MySQL, PostgreSQL, REST APIs, JavaScript, Next.js, React
Backend Features: Role-based access control (Spatie Permission), Stripe payments and subscriptions, background jobs and queues, dynamic forms, workflow automation
Also Used: NestJS, TypeScript, Node.js, MongoDB, Python, Flutter, Inertia.js, Tiptap Editor, HTML, CSS, C#, ASP.NET MVC, SQL Server
Tools: Git, Jira, Agile development

Professional Experience

V2F Solutions | Software Engineer | Jul 2024 – Present

- Build Laravel and NestJS REST APIs and Next.js/React features for five platforms.
- Integrated Stripe subscription and payment flows; implement RBAC and activity logging with Spatie.
- Built admin-managed configurable workflows, map-based dynamic questionnaires and workflow automation.
- Create background jobs and queues; troubleshoot production issues and optimize database functionality.

SoftFit Technologies | ASP.NET Intern | Aug 2023 – Oct 2023

- Built Attendance and Leave Management module features in ASP.NET MVC (C#, SQL Server) with CRUD operations.
- Resolved bugs and improved UI consistency of the Attendance module.

Projects

Wellsnax – Role-Based Nutrition Platform

Laravel | Next.js | React | MySQL | Stripe | Live: wellsnax.vercel.app

- Implemented meal planning, dashboards and curriculum management.
- Built secure role-based access for coaches, learners and administrators.
- Integrated Stripe subscription and payment flows.
- Shipped REST APIs and front-end features keeping planning, content and billing in sync.

Elevare – Multi-Tenant Education Platform

Laravel | Next.js | MySQL | REST APIs | Live: elevare.tuscanpartners.com

- Developed REST APIs for tenant-aware education workflows.
- Implemented RBAC for consistent permissions across tenants and roles.
- Built workflow automation that reduces manual coordination.

Project Tracker (SkySync) – Project Operations Platform

Laravel | Next.js | CRM | Live: skysync.productsdemo.co

- Building CRM modules for client and pipeline tracking.
- Building sprint and delivery workflows for ongoing projects.
- Adding finance and reporting modules that turn operational data into insight.

RICH – Accident Reporting Platform

Laravel | MySQL | JavaScript | Maps

- Implemented map-based dynamic questionnaires that adapt reports to location and context.
- Built admin-managed configurable workflows instead of hard-coded report paths.
- Helped shape a reporting experience non-technical admins can evolve.

Adapt – National Accreditation Platform

NestJS | Next.js | PostgreSQL | REST APIs | Live: adapt.naymatcollateral.com

- Contributed NestJS backend services and Next.js front-end work.
- Developed REST APIs modelling accreditation processes and institutional workflows.
- Implemented role-based features for reviewers, institutions and admins.

IoT Sensors Based Smart Farm Irrigation System

Final Year Project (PEC-FYDP 2023), co-developer in a team of three | Bahria University Karachi, supervised by Engr. Majid Kaleem

IoT | NodeMCU | Node.js | MongoDB | Python | Random Forest | Flutter

- Co-built a prototype that automates irrigation from live soil data: IoT hardware, server, ML service and mobile app.
- Helped build the Node.js/MongoDB backend with JWT auth and REST/WebSocket APIs behind Nginx.
- Worked on the Python Random Forest model that predicts whether and how long to irrigate.
- Contributed to the Flutter app: crop pairing, live monitoring, logs, scheduling and remote override.
- Delivered with Agile Feature Driven Development: 19 tasks, SRS and a 30-case test suite.
- Code: github.com/Hassan-Khan16/python-farm-app-v2

Education

Bachelor of Software Engineering

Bahria University, Karachi Campus | Sep 2020 – Jul 2024 | EQF level 6

Relevant coursework: Data Structures and Algorithms, Database Management Systems, Web Engineering, Software Design and Architecture, Cloud Computing, Information Security, Agile Software Development, Software Testing.

Certifications

Introduction to C# Programming and Unity — Coursera, University of Colorado System (Oct 2022)
HTML, CSS, and JavaScript for Web Developers — Coursera, Johns Hopkins University (Sep 2023)
Get the most out of Jira — Atlassian (Jan 2025)
AI Python for Beginners — DeepLearning.AI, via Coursera
